

AI Recipe Generator - Project Documentation

Project Overview

AI Recipe Generator is a full-stack web application that uses Google's Gemini LLM to generate personalized recipes from user-provided ingredients. Built with React.js, Node.js, and Express.js, it demonstrates AI integration into a modern web application.

Features

- Dynamic ingredient management
- AI recipe generation
- REST API integration
- Responsive UI

Tech Stack

React.js, JavaScript, HTML, CSS, Axios, Node.js, Express.js, Gemini API, Git, GitHub, VS Code, Netlify.

Workflow

User enters ingredients → React frontend → Express backend → Gemini API → Generated recipe displayed to user.

Learning Outcomes

React, Node.js, Express.js, REST APIs, Gemini API integration, Prompt Engineering, Full Stack Development.
